

## COMFORT plus voice V30

BLOOD GLUCOSE  
MONITORING SYSTEM

### Advanced testing for a healthy balanced life

Based on reliable, progressive Swiss technology, the FORA COMFORT plus voice V30 monitor helps diabetics of all ages maintain productive lives. With accuracy you can count on and extreme ease of use, this glucose monitor is ideal for discreet testing - any time, any place. Using the smallest blood sample the world has ever known, testing is flexible enough to fit well into anyone's lifestyle. We have included all the most sophisticated functionalities available on the market today so you can be sure that you are getting the highest quality and dependable device available.

#### Friendly Voice Assistance

Our unique audio guide talks you through all the testing stages and results.

#### Clear, Wide Screen View

Comfortable result reading for people of all ages and eyesight quality.

#### The World's Smallest Blood Sample

Only a discreet 0.5µL is needed for testing.

#### Pre \ Post meal

You can check & calculate your sugar levels both before & after meals.

#### Alternative Site Testing

Reduce pain by testing from palms, forearms, upper arm, calve and thigh for proven, accurate results.

#### Worry-free Strip Mechanism

A reliable digital indicator confirms that the testing strip is securely inserted and ejection takes just a single click.

#### Memory Up to 450 Tests Including Date and Time

Calculates your average weekly, bi-weekly and monthly sugar levels both before and after meals at the click of a single button.

#### 4 Reliable Alarm Settings

Let us remember your testing times for you with 4 different daily reminders.
